***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ohsawa (US 5732153).

Ohsawa discloses an image processing system (Fig. 12) and method (Fig. 14) in a third embodiment, which comprises:

an image classifier or filter (107) that identifies the image as being a photographic image type or a character / diagram image type using varying characteristics of the image such as pixel intensity and differences relative to neighboring pixel values (see col. 7, line 40 to col. 8, line 35); and

a processing circuit 108 that, upon identification of varying characteristics of the image, selectively outputs an image to which a constant threshold is applied to the image (104), or one of two dynamic thresholding or dithering techniques is applied to the image (106 and 107).

Ohsawa further discloses performing white edge detection (176) and black edge detection (177).
